4. Discussion and Possible Action on Title 16, California Code of Regulations Section 1571 (Glaucoma Grand Rounds Program); Recommendation to Full Board

Audio of Discussion: [02:49 / 46:12](#)

Dr. McIntyre confirmed that she and Dr. Wang did not have any issues with the glaucoma presentation other than that a couple of the patients were not dilated. Dr. Wang stated that she had a conversation with one of the head doctors in charge of the on-site program; she explained that there were one or two patients who could not be dilated due to medical conditions.

Dr. Wang announced that Marshall B Ketchum University (MBKU) had to obtain a waiver for their virtual grand round course. MBKU suggested that this Committee make a recommendation to the Board to strike the phrase “patients must be evaluated in person”. Dr. Wang explained that the glaucoma grand rounds programs are very expensive to run, so the universities are offering fewer of them than in previous years. Therefore, breaking the barrier of evaluating patients in person will make the course more accessible to students and optometrists. Dr. Chawla noted that the majority are glaucoma certified upon graduation, so the number of persons needing these courses will become fewer and fewer. Drs. Garcia and Chawla stated that they would be okay with changing the language to be somewhat more liberal with respect to presenting online.

Dr. Garcia asked if this change would, in any way, go against the original scope expansion with glaucoma language? Ms. Murphy responded that within this statute there is no change. This would just be within the Board’s regulations. The language “patients must be evaluated in person” is the only barrier; there will not be any change in the scope as far as the statute is concerned. Drs. Garcia and McIntyre expressed their support of the recommendation.

There were no requests for public comment.

Debra McIntyre moved to strike the language as recommended. Jeffrey Garcia seconded. The Committee voted unanimously (4-0) and the motion passed.
